KDA, Kuantic Digital Assistant,

Introducing a revolution in connected vehicle management

KDA is transforming the way to manage journeys and optimize your fleet. The new Kuantic Digital Assistant (KDA) mobile application allows the easy use of knowing miles traveled for business or personal use with your company car. This innovation is based on a machine learning algorithm.

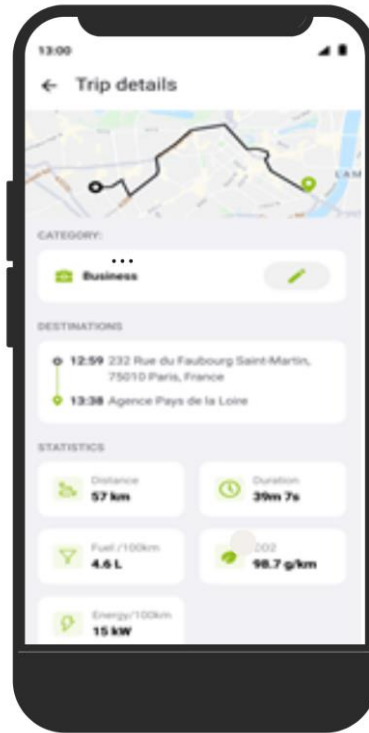

The KDA application, from KUANTIC, supports the management of personal and professional journeys and anticipates your needs. Providing best in class functionality:

- **Trip classification has been reinvented:** no more trouble of tedious trip reports for drivers. The app automatically classifies journeys using **artificial intelligence**, saving time and freeing up paperwork. The precise and justifiable list is a valuable help in managing expenses. Machine learning allows you to qualify journeys based on habits and brings more automation and simplification to the process.
- **Eco-driving, for smart driving:** KDA does not just track journeys, it helps you to drive your vehicle in a safer and more environmentally friendly way. This new co-pilot offers personalized tips and helps reduce your carbon footprint, while saving on fuel costs.
- **At a glance:** KDA allows you to validate and analyze your journeys at any time on your smartphone,
- **Summary for fleet managers:** for fleet managers, KDA provides a real-time overview of fleet status, with eco-driving scores for each driver.. Providing live fleet visibility and giving the user to make insightful decisions

"KDA represents a real evolution in the vehicle management sector ", says Dominique DOUCET, CEO of Kuantic. "We have developed a unique solution to free drivers from tedious tasks and help them become more eco-responsible drivers."

KDA is accessible to any KUANTIC customer.

The application is available via Android Play Store and Apple Appstore.

About KUANTIC group

Since its inception 20 years ago, KUANTIC has been innovating on the fleet management and car sharing market for professional fleet managers.

Its value-added service solutions enable customers to optimize their connected fleet operations, control their operating costs, ensure driver safety through maintained vehicles and recommendations for safer driving.

KUANTIC helps fleets optimize their mobility needs in order to control and reduce their carbon emissions.

by developing services to offer innovative solutions to the challenges of professional mobility.
